Pilnstikla margu sērija
Framless balustrade series

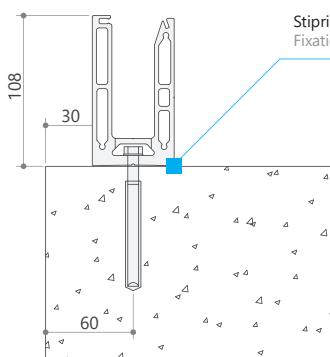

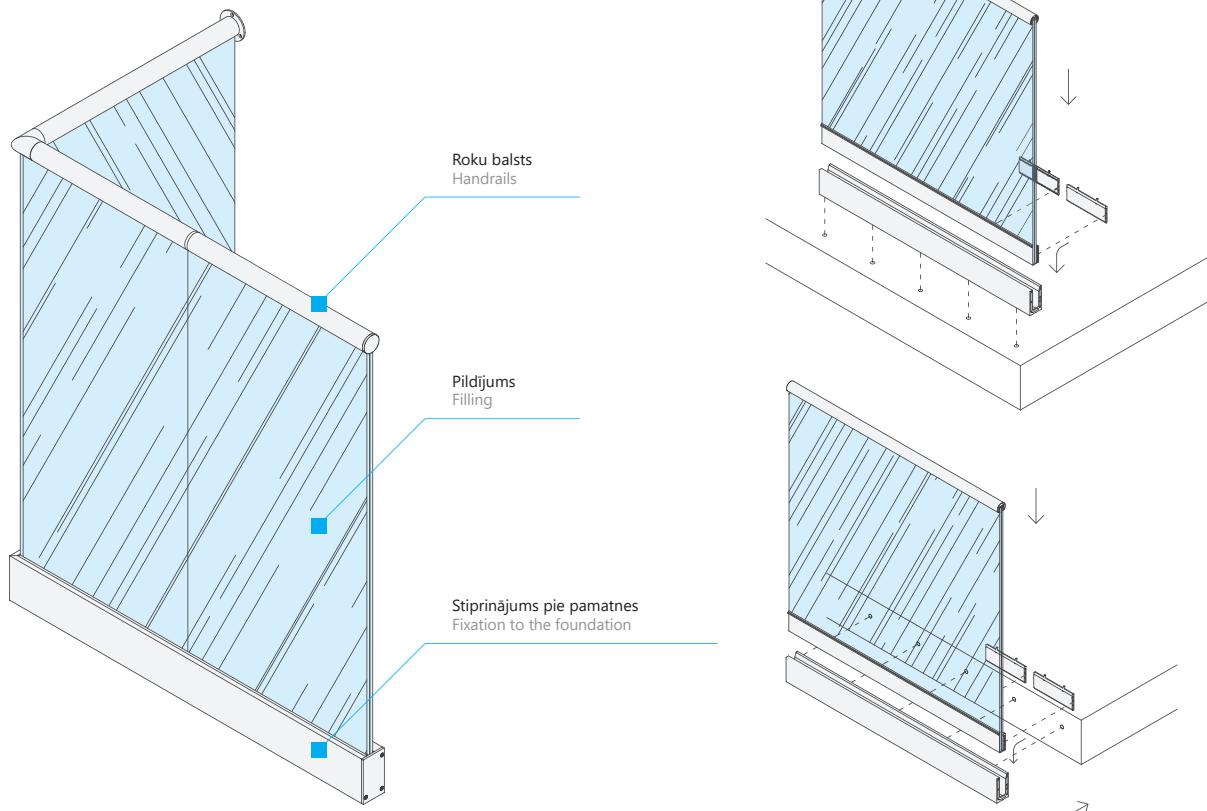

Margu sistēma, kurai pamatā ir norobežojoši masīvi stikla paneli. Tie veido visas konstrukcijas stabilitāti un noturību. Stikla paneļiem var piestiprināt koka, nerūsējošā tērauda vai cita materiāla margu, kas konstrukcijai piešķir papildu pievilcību. Sērijas 400 margas skaisti papildina kopējo ēkas arhitektūru.

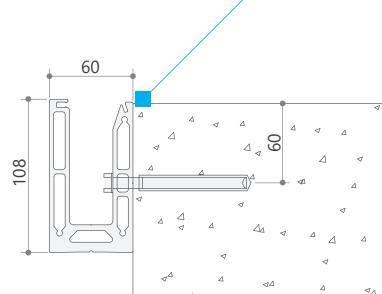

Aesthetic railing system with two separate massive glass panels at the base. These panels make the structure stable and durable. The glass panels can be supplemented with railings made of wood, stainless steel or other materials, making the structure even more attractive. Series 400 railings greatly compliment the overall architecture of a building.

Nemaīnīgi plašs skats uz ainavu
Consistently great view over the landscape

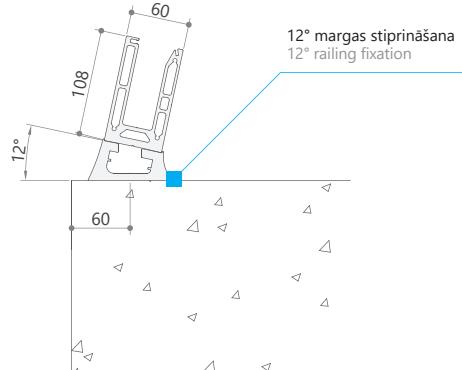

Trokšņu slāpējošs risinājums
Noise-cancelling solution

Fixation on the foundation

Fixation at the side

SĒRIJA 400

Laikmetīga arhitektūra vienmēr ir aktuāla, un tādai piestāv pilnstikla margu dizains. Pilnstikla margu projektos dominē un akcentu piešķir tieši stikla pildijums, ko papildina elegants roku balsts. Pildījumam tiek izmantots rūdītais laminētais stikls, kam piemīt augsta izturība.

SERIES 400

Contemporary architecture never loses its appeal and is greatly benefited by a solid glass railing design. The solid glass railing projects are dominated and made notable by glass filling, supplemented by an elegant handrail. The filling comes in the form of tempered laminated glass which is exceptionally durable.

RIPO is one of the leading manufacturers of railing and balcony glazing systems in Latvia. The company provides full cycle production process from structure design to production in the large industrial premises. RIPO specialists will find the best solutions to your particular situation, implementing all of your intentions either it is private residence or apartment houses. RIPO has been introducing high quality standards in its industry and customer approach since 1993.
